SUBJECT INDEX

Anabolic steroid(s)
  and lymphocyte function in sedentary and exercise-trained rats, 225
Androgens
  effects of intermittent, suppression on the stem cell composition and the expression of the TRPM-2 (clusterin) gene in Shionogi carcinoma, 501
  effects of, on brain and pituitary androgen receptors and LH secretion of male guinea pigs, 315
  receptor(s)
    effects of androgen on brain and pituitary, and LH secretion of male guinea pigs, 315
    induction of cell-free, *in vitro* transcription by recombinant, peptides, 243
    transcriptional activation and transient expression of, in human, 9
  regulation of ribosomal RNA synthesis by, in LNCaP cells and rat prostate, 431
Antitumor activity
  of RU 58668, 449
Apoptosis
  changes in levels of mRNAs of transforming growth factor (TGF)-β1, -β2, -β3, TGF-β type II receptor, and sulfated glycoprotein-2 during, of mouse uterine epithelium, 367
Aromatase
  activity and CYP 19 gene expression in breast cancers, 191
  activity assay and application in normal, adenomatous and malignant breast parenchyma, 305
  7α-arylaliphatic androsta-1,4-diene-3,17-diones as enzyme-activated irreversible, inhibitors, 93
  detection of, mRNA by reverse transcription-polymerase chain reaction, 163
  studies into, activity associated with fetal allantochorionic and maternal endometrial tissues of equine placenta, 281

Bone
  effect of progestins, 357
Brain
  effect of progestins, 357
Breast
  effect of progestins, 357
Breast cancer
  aromatase activity and CYP 19 gene expression in, 191
  aromatase activity assay and application in normal, adenomatous and malignant breast parenchyma, 305
  detection of aromatase mRNA by reverse transcription-polymerase chain reaction in human, aromatase gene expression and its exon-1 usage, 163
  multiple splicing variants of the estrogen receptor are present in individual human, 251
  sex hormone binding globulin mRNA in human, 297
Breast cancer cell lines
  triiodothyronine mimics the effects of estrogen in, 271

cDNA
  cloning and mRNA expression of Zebra finch estrogen receptor, 135
Corticosteroid(s)
  effects of, on parameters related to Na^+ transport by amphibian renal distal cells (A6) in culture, 323
Creatine kinase B
  tissue selective action of tamoxifen, methiodide, raloxifene and tamoxifen on, activity *in vitro* and *in vivo*, 389
Cytochrome P450
  equine, aromatase exhibits an estrogen 2-hydroxylase activity *in vitro*, 55

Dehydroepiandrosterone sulfotransferase
  pharmacogenetics of, in human, quantitative Western analysis and gene sequence polymorphisms, 467
Dexamethasone
  effects of, on (N^++K^+)-ATPase and other parameters related to transepithelial Na^+ transport by amphibian renal distal cells (A6) in culture, 333

Dihydrotestosterone
effects of, on the expression of p185^{erbB2} and c-erbB-2 mRNA in the prostatic cell line LNCaP, 441

Endometrial cancer cell(s)
characterization of the functional progesterone receptor in Ishikawa, 31
sex steroids regulate the expressions of plasminogen activator inhibitor-1 and its mRNA in uterine, Ishikawa, 59
Endometriosis
effect of progestins, 357
Endometrium
cloning and characterization of a glycogen synthase cDNA from, 459
effect of progestins, 357
effects of RU486 on, in primates, 179
Environmental estrogen(s)
effects of, on cholesterol lowering and bone in the ovariectomized rat, 155
Estradiol and estrone
sulfation by guinea pig chorion and uterus: differential action towards, 479
Estrogen(s)
membrane binding sites and nongenomic effects of, in cultured human pre-osteoclastic cells, 233
receptor(s)
cloning and mRNA expression of Zebra finch, cDNA, 135
in the uterus of rat, effect of antioxidant enzymes, 215
multiple splicing variants of, are present in individual human breast tumors, 251
triiodothyronine mimics the effects of, in breast cancer cell lines, 271
Estrogen 2-hydroxylase
equine cytochrome P450 aromatase exhibits an, activity *in vitro*, 525
Estrogen responsive element
estrogen-induction of TGF-α is mediated by an, composed of two imperfect palindromes, 261
stability of the ligand-estrogen receptor interaction depends on, flanking sequences and cellular factors, 413
Estrone sulfatase
inhibition of placental, activity and MCF-7 breast cancer cell proliferation by estrone-3-amino derivatives, 83

Gene(s)
bacterial 3α-hydroxysteroid dehydrogenase is homologous to a fusion of bacterial ribosomal L10 and L7/12, 365
effects of intermittent androgen suppression on the expression of the TRPM-2 (clusterin), in Shionogi carcinoma, 501
Gene expression
aromatase activity and CYP19, in breast cancers, 191
aromatase, and its exon-1 usage in human breast tumors, 163
characterization of 5α-reductase, in stroma and epithelium of human prostate, 397
of 5α-reductases 1 and 2, human ovarian follicles, stroma and corpus luteum, 199

Human leukemic cells
1α,25-dihydroxy-24-oxo-16-ene vitamin D_3, a metabolite of a synthetic vitamin D_3 analog, 1α,25-dihydroxy-16-ene vitamin D_3, is equipotent to its parent in modulating growth and differentiation of, 405
Human serum albumin
shares the properties of estrocolyone-I which inhibits the proliferation of estrogen-target cells, 147
17α-Hydroxylase
gene expression in the bovine ovary, 21
3α-Hydroxysteroid dehydrogenase
bacterial, is homologous to a fusion of bacterial ribosomal L10 and L7/12, 365
17α-Hydroxysteroid dehydrogenase
purification and characterization of, from the filamentous fungus *Cochliobolus lunatus*, 205
20β-Hydroxysteroid dehydrogenase
immunochemical distribution and immunohistochemical localization of, in neonatal pig tissues, 485

Immunological system
effect of progestins, 357
αβ1 Integrin
progesterone-induced expression of, 31

Juvenile hormone
activity of, and its analogues on the growth of *Trypanosoma cruzi*, 495

LNCaP cells
androgen regulation of ribosomal RNA synthesis in, 431
Luteinizing Hormone (LH)
effects of androgen on, in male guinea pigs, 315
effects of dihydrotestosterone on the expression of $p185^{erbB2}$ and c-erbB-2 mRNA in the, prostatic cell line, 441

Mammary gland
steroidogenic enzymes in the bovine, at different functional stages, 339
MCF-7 breast cancer cell(s)
inhibition of, proliferation by estrogen-3-amino derivatives, 83
response-specific antiestrogen resistance in a newly characterized, resulting from long-term exposure to trans-hydroxytamoxifen, 121
mRNA
aromatase, detection by reverse transcriptional-polymerase chain reaction, 163
changes in levels of, of transforming growth factor (TGF)-β1, -β2, -β3, TGF-β type II receptor, and sulfated glycoprotein-2 during apoptosis of mouse uterine epithelium, 367
effects of dihydrotestosterone on the expression of $p185^{erbB2}$ and c-erbB-2, in the LNCaP prostatic cell line, 441
expression in Zebra finch estrogen receptor cDNA, 135
of $\alpha\beta$1 integrin in Ishikawa cells, 31
of 17α-hydroxylase in bovine ovary, 21
of plasminogen activator inhibitor-1 in Ishikawa cells, 1
of the human androgen receptor, 9
sex hormone binding globulin, in human breast cancer, 297
Murine osteopontin response element
vitamin D receptor interactions with, 377

Nomegestrol acetate
effect of progestins, 357

Opioids
regulation of cell proliferation in the developing rat uterus by, and effects during the period of sexual maturation, 173
Ovary
17α-hydroxylase gene expression in bovine, 21

Plasminogen activator inhibitor-1 (PAI-1)
sex steroids regulate the expressions of, and its mRNA in Ishikawa cells, 1
Pre-osteoclastic cells
membrane binding sites and nongenomic effects of estrogen in cultured, of human, 233
Progesterone
antagonists
antiovulatory activity of, in the rat, 75
receptor(s)
characterization of the functional, in Ishikawa cells, 31
concentrations in uterus of rat, 215
Progestin(s)
present and future, 357
Prostaglandins PGI_2
RU 38486 inhibits, release from human myometrium, 63
Prostate
characterization of 5α-reductase gene expression in stroma and epithelium of, in human, 397

Receptor(s)
androgen(s)
effects of androgen on brain and pituitary, and LH secretion of male guinea pigs, 315
induction of cell-free, *in vitro* transcription by recombinant, peptides, 243
transcriptional activation and transient expression of, in human, 9

estrogen(s)
cloning and mRNA expression of Zebra finch, cDNA, 135
in the uterus of rat, effect of antioxidant enzymes, 215
multiple splicing variants of, are present in individual human breast tumors, 251
progesterone
characterization of the functional, in Ishikawa cells, 31
concentration in uterus of rat, 215
vitamin D
interactions with the murine osteopontin response element, 377
Recombinant androgen receptor peptides
induction of cell-free *in vitro* transcription by, 243
5α-Reductase
characterization of, gene expression in stroma and epithelium of human prostate, 397
expression of 1 and 2, in human ovarian follicles, stroma, and corpus luteum, 199
Retroprogesterones, 357
Reverse transcription-polymerase chain reaction (RT-PCR)
detection of aromatase mRNA by, 163
Ribosomal RNA
androgen regulation of, synthesis in LNCaP cells and rat prostate, 431
RU 3117
a steroidal compound with high affinity for Sigma sites in rat testis membranes, 49
RU 38486
endometrial effects of, in primates, 179
inhibits prostaglandin PGI_2 release from human myometrium, 63
RU 58668
in vitro and *in vivo* pharmacological data related to the antitumoral activity of, 449

Sex hormone binding globulin (SHBG)
mRNA in human breast cancer, 297
Sex steroids
regulation of plasminogen activator inhibitor-1 and its mRNA expression by, in Ishikawa cells, 1
Shionogi carcinoma
effects of intermittent androgen suppression on the stem cell composition and the expression of the TRPM-2 (clusterin) gene in, 497
Steroidogenic enzymes
occurrence of, in the bovine mammary gland at different functional stages, 339
Sulfatase inhibitors
activities of nonsteroidal compounds, 41
Sulfation
by guinea pig chorion and uterus: differential action towards estrone and estradiol, 479

Tamoxifen
tissue selective action of, on creatine kinase B activity *in vitro* and *in vivo*, 389
Testis
RU 3117, a steroidal compound with high affinity for Sigma sites in rat, membranes, 49
Tibolone, 357
Transforming growth factor-α
estrogen-induction of, is mediated by an estrogen responsive element composed of two imperfect palindromes, 261
Transforming growth factor-β
changes in levels of mRNAs of, (TGF-β1, -β2, -β3), TGF-β type II receptor, and sulfated glycoprotein-2 during apoptosis of mouse uterine epithelium, 367
Trans-hydroxytamoxifen
response-specific antiestrogen resistance in a newly characterized MCF-7 human breast cancer cell line resulting from long-term exposure to, 121
Triiodothyronine
mimics the effects of estrogens in breast cancer cell lines, 271

Vascular system
effect of progestins, 357
Vitamin D
effects of growth and differentiation of human leukemic cells, 405
receptor(s)
interactions with the murine osteopontin response element, 377

We would like to express our deep thanks to the following persons for their kind collaboration in reviewing papers for this volume of *The Journal of Steroid Biochemistry & Molecular Biology:*
